Use Case Template

Use Case ID:	P1		
Use Case Name:	Enter start and end points		
Created By:	Victoria Thomson	Last Updated By:	Toshit Panigrahi
Date Created:	10/2/16	Date Last Updated:	10/6/16

Actors:	User
Description:	Type in starting and ending locations
Trigger:	Start of trip
Preconditions:	User knows where they want to go.
Postconditions:	Route from start location to end location.
Normal Flow:	Open app, sign in, plug in start location, plug in end location, wait for result to load, and specify interesting "distractions" user would like to visit along route.
Alternative Flows:	Select a pre planned start/end to explore product
Exceptions:	Incorrect address input (spelling error, mistype), system would respond by suggesting locations nearby based off of zip/city/street.
Includes:	Making an account (Use Case 4)
Priority:	Mandatory
Frequency of Use:	Once/twice per route
Business Rules:	N/A
Special Requirements:	Internet access
Assumptions:	Internet connection working
Notes and Issues:	TBD
